Hi Kathy-

I checked with Darren and he confirmed that you can only enter the info once a "request exclusion" code is placed on the data – so you are correct.

Thanks-
Sara

Subject: Exceptional Events

I have flagged several events with the "I" codes for information only (Sahara Sands event in June and Fireworks July 4). When I went to Maintain where we fill in information about the event, the drop down menu only has "R" coded selections. I am assuming EPA does not want the information filled out if we are using "I" codes. Is that correct?
